The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-22,24 and 28-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moss in view of either Yuen or Kuemmerlin. Moss shows the claimed hinge and rail assembly in figs. 33,34 having abutment shoulders 242 that includes an arcuate portion adjacent 194, rail mounts 194, 196 or 20a and 20b and rails 18. Figs. 9,14,17,24 and 25 showing rail mounts 20 having varying cross-sections, as set forth in claims 19,20,30 and 31, with the exception of the mount being inserted within the rails. Yuen and Kuemmerlin show mounts inserted within their rails. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Mount portions of Moss to enable insertion into is rails as shown in fig. 17, as taught by either Yuen or Kuemmerlin, for attaching his mounts interiorly of his rails.

Applicant's arguments filed 2/28/07 have been fully considered but they are not persuasive. It is noted that the proposed amendment was made before the application of the prior art to Moss.
